

REUNA
Some networks update

REUNA's Network: Current Capacities

155Mbps* will be upgrade to 1G
(2nd Q 2012)

Some networking activities

- ❖ On January 2012 REUNA and ALMA signed and MoU to formalize the join activities have being developed between us also the common interest.
- ❖ In place Amlight Andes link from SCL – Miami for AURA services (Feb-2012)
- ❖ Working to change our local connectivity to RedCLARA from 1G to an optical path. 10G OTU-2 lambda over dark fiber.
- ❖ Working to establish Layer 2 circuit (VLAN) from NRAO/ALMA to UVA, passing through REUNA-West link SCL-Mia-Ampath The VLAN is set-up from ALMA – REUNA – AMPATH, pending the extension to UVA.
- ❖ Working to establish a Layer 2 circuit (VLAN) between RNP-REUNA to pass traffic from SOAR to astronomical users in Brazil (LNA, ON, INPE, USP, UFRJ, UFRGS, and several others Universities). Technical discussion being in placed.
